

Overview

PrimoHive™ is our exclusive brand line that BeePharma produces to meet the increasingly global market demand for safe, quality, and pure BEEHIVES products, such as Manuka Honey, Pollen, Royal Jelly, Bee Bread, and more.

PrimoHive™ products are proudly held as the “**Product of Australia**” where the clean and sustainable beekeeping industry is.

Pure Australian manuka honey (AMH) is our premium product in the PrimoHive™ brand line.

Product Features-Manuka

Our Australian Manuka Honey comes from Australian pristine. The natural environment where the Honey bees collect the nectar and pollen from the Australian Manuka trees (Scientific name: *Leptospermum*), which are native to Australia and NZ.

Our Manuka honey is Pure, authentic, and unadulterated Honey.

Australian Manuka Honey differs depending on the MGO (Methyloxal) level. The more MGO is, the more therapeutic and bioactive it is.

Our AMH comes in 250gr jars, with different MGO from 30+ to 800+.

Manuka honey is a dark monofloral honey rich in phenolic content, and currently, it is gaining much attention for its antimicrobial activity.

The antiMicrobial potency of Manuka honey was discovered to be related to the MGO instance.

Product Benefits

Benefits of Australian Manuka Honey:

- Kills “SuperBugs” and stimulates wound healing.
- Soothe a throat sore.
- Boost energy and immune system
